Education

Computer Science (COMSCI) | DCU | 2023 – (expected 2027) |

- Third Year Grade: 2.1

Projects

1.) SenseAlm – CS2 Community Anti-Cheat Platform (*Django, React, ML*)

- Built community platform with ML-based gameplay analysis to detect cheating in uploaded CS2 clips. 2-person team, with 50+ passing test cases.
- Combined traditional detection with AI predictions achieving 94% accuracy and implemented social features (posts, reactions, comments, real-time DMs).

2.) Vibe Coder AI – Gemini-Powered Code Generation Tool (*JavaScript, Gemini API*)

- Created web app generating JavaScript code, canvas drawings, and games from natural language prompts across three modes, with conversation memory and live iframe.
- Added random idea generator with curated prompts and mode-specific validation rules.

3.) Custom Shell – Unix-like Shell in C (*C, Linux*)

- Developed Unix shell from scratch with Makefile, supporting interactive and batch modes.
- Implemented internal commands (cd, clr, dir) with 10+ commands implemented, external program execution, file redirection, and error handling.

Employment History

Mobile Network Testing Intern | 1Global

Nov 2024 - May 2025

- Ran extensive tests on SIMs & eSIMs – calls, SMS, data, call forwarding, tethering, Wi-Fi speed, voicemail, barring, roaming, etc.
- Used Postman API for REST requests to create accounts, provision eSIMs, and debug provisioning issues.
- Filed detailed bug reports and tracked defects in Jira; analysed OCS CDR logs to verify call/SMS/data records.
- Handled number porting across countries – initiated ports, ran live test calls, and confirmed completion.

Cinema Operative | Movies@Dundrum

Nov 2024 - May 2025

- Managed ticket sales, hot food service, and customer inquiries while maintaining screening rooms.
- Assisted guests to 100+ VIP screenings and developed strong teamwork and time-management skills in a fast-paced environment.

Sales Assistant | Costcutters, Windy Arbour

Jan 2024 - Aug 2024

- Processed transactions, restocked shelves, and trained 4 new staff.
- Promoted to leadership within two months; managed store opening/closing and daily operations.

Skills:

Languages: Python, Java, JavaScript, C, SQL, Shell, Bash

Web: React, Django, HTML/CSS, Git

Systems & AI: Linux, UNIX/GNU, DevOps, Windows

Practices & Tools: Testing, CI/CD, Technical documentation, Agile approach

Interpersonal: Teamwork, Communication, Problem Solving, Time Management, Creativity, Adaptability, Leadership
